Hear the latest from family members, professionals and experts in the field as together we seek to make 'Full Citizenship' real.

The Perth Forum provides an opportunity for Western Australians directly and indirectly affected by disability to:

- Learn about the 'Vancouver Benchmarks' international statement from the Conference and examine its relevance to the local situation;
- Consider together how an NDIS/NDIS My Way can best facilitate individual citizenship and what supports might enable this to happen;
- Learn about leading edge initiatives and innovations that support people with complex support needs in other parts of the world to be full citizens;
- Explore together the relevance and applicability of leading edge thinking and practices from other parts of the world to the local context; and
- Determine what actions need to be taken by whom to enhance opportunities for people with disability to be full citizens in Australia.
